Computer Programming – I

a) Write a program which read a number (from 1-99) from the keyboard and writes its text correspondence to the screen as follows.

      Enter the Number : 72
      The text of the value is : seventy two

      Enter the Number : 64
      The text of the value is : sixty four

      Enter the Number : 9
      The text of the value is : nine

Note: You need to reach the digits by the use of "%" and "/" operator.

b) Write the same program for THREE-digit number.

      Enter the Number : 172
      The text of the value is : one hundred and seventy two
